

Price Revision Notice for High-Speed Steel (HSS) Collet Chucks and Guide Bushes

June 15, 2026

Dear Valued Customers,

Thank you for your continued support and for choosing A-One Seimitsu Inc. products.

Earlier this year, due to a significant increase in the procurement cost and reduced availability of tungsten carbide powder, we revised the prices of our carbide-tipped collet chucks and guide bushes.

At that time, we maintained the prices of our High-Speed Steel (HSS) products, which are manufactured using SUJ2 material and do not contain carbide.

However, in recent months, overall manufacturing costs have continued to rise, including raw material costs, tooling expenses, equipment costs, electricity costs, machine oil expenses, and labor costs. In addition, the required specifications and precision levels for collet chucks and guide bushes have become increasingly sophisticated.

As a result, it has become difficult to maintain the current pricing structure while continuing to provide the high level of quality our customers expect.

Although we have maintained the prices of our collet chucks and guide bushes for more than 50 years since the start of our business, we have determined that a price revision for our HSS products is now unavoidable.

We sincerely appreciate your understanding and continued support.

Price Revision Details

Applicable Products: High-Speed Steel (HSS) Collet Chucks and Guide Bushes

New Price: 90% of the current price of carbide-tipped collet chucks and guide bushes

Effective Date: For quotations and orders received on or after July 1, 2026

Thank you for your continued partnership.

Sincerely,

Tetsuya Hayashi

President & Representative Director

A-One Seimitsu Inc.
